

How to Use

BIRTHDAY WEBSITE GENERATOR GUIDE

Step-by-Step Instructions

STEP 1

Open the Website

Open the provided website link in your preferred web browser to begin.

STEP 2

Customize Your Birthday Page

Fill in the required personal details in the customization form:

- Birthday Person's Name
- Your Name
- Birthday Message

STEP 3

Preview

Click the **Preview** button to review the layout and configuration, making sure everything looks perfect before generating the live page.

STEP 4

Generate Your Birthday Website

Once you are completely satisfied with the preview, click the **Generate** or **Create** button to officially build your personalized birthday website.

STEP 5

Share the Link

Copy the uniquely generated website link and easily share it with your loved one through popular platforms like WhatsApp, Instagram, Telegram, or any other digital channel.

BEST EXPERIENCE

- Use the latest version of modern browsers: Google Chrome, Microsoft Edge, Safari, or Firefox.
- Keep your internet connection active while creating the website.
- For the absolute best performance, ensure you are connected to a stable internet network.

IMPORTANT NOTES

- Always double-check all text and input information carefully before final generation.
- Depending on your current internet speed, the processing and generation phase may take a few seconds to complete.
- If you do not immediately receive your website link after completing the payment, or if you encounter any unexpected technical issues, please reach out to us right away for support.

TIPS

- Write a deep, heartfelt birthday message to make it truly memorable.
- Share the website link precisely on their birthday for the ultimate surprise experience.

NEED HELP?

If you have any questions, did not receive your website link, or face any technical difficulties, feel free to contact us immediately for prompt assistance.
